

Building Progress Continues

Tuesday, 25 January 2011 21:50

January 25, 2010

TriMark Contractors has crews on site hanging sheet rock, taping and texturing, installing our exterior surface covering (with its concrete base), and continuing to work on the electrical system. Our crew continues to make great progress on all aspects of our building program. These pictures show an exterior view, the front and back (with the round window) of our sanctuary, and the current status in our fellowship hall.
